## INTRODUCTION

This publication has been developed by the Facility Licensing and Investigations Section of the Department of Public Health, in accordance with the General Statutes of Connecticut, Section 19a-538. The publication contains a listing of all nursing home facilities licensed by the State of Connecticut and general information pertaining to each facility.

This book contains three distinct nursing home licensure categories which are defined in the Public Health Code of the State of Connecticut, Section 19-13-D1 (b) Definitions, as follows:

- **CHRONIC AND CONVALESCENT NURSING HOME**  
A long term institution having facilities and all necessary personnel to provide skilled nursing care under medical supervision and direction to carry out simple, non-surgical treatment and dietary procedures for chronic disease or convalescent stages or acute diseases or injuries.
  
- **REST HOME WITH NURSING SUPERVISION**  
An institution having facilities and all necessary personnel to provide, in addition to personal care required in a residential care home, nursing supervision under medical direction twenty-four hours per day.
  
- **RESIDENTIAL CARE HOME**  
An institution having facilities and all necessary personnel to furnish food, shelter and laundry for two or more persons unrelated to the proprietor and in addition, providing services of a personal nature which do not require the training or skills of a licensed nurse. Additional services of a personal nature may include assistance with bathing, help with dressing, preparation of special diets and supervision over medications which are self-administered.

Nursing home facilities in each licensure category are listed by name in alphabetical order.

The Table of Contents identifies each town in alphabetical order and each nursing home facility located within a specific town. The Table of Contents also identifies the level of care of each facility.

The Index lists all nursing home facilities in alphabetical order and lists the level of care of each facility.
